Spring-Summer Roebuck hunting in Hungary or Romania 2021-22

4 night/ 3 hunting days Experience Package (Includes 5 Representative bucks)

Highlights

While in most countries spring and summer are off-hunting seasons, Hungary and Romania offer enjoyable Roe Buck hunting during these months too.

These countries are famous for their excellent habitat, sustainable wild game management practices, world-class trophies, and the most successful Roe buck hunts on the best free-range grounds in the Central-European region.

We offer this package for those who would like to fully enjoy the spring nature vibes in the most ideal climate and to get the best experience of a Roe Buck hunt, without chasing record size trophies.

Roe Buck hunting is a perfectly suitable program for summer family vacation or shorter business trips in Europe.

Hunting Season:

Season: April 15 - September 30

In the early months of the Spring, there are better chances to see higher number of animals, as the vegetation is not thick or high to cover the deer. Due to the solid deer population multiple shooting opportunities may arise daily.

In the middle of summer, the rutting season provides the sophisticated 'stalk and call' hunting method, giving a chance to see the oldest and most elusive mature bucks with a wide variety of antler sizes and formations.

Trophy Size:

The average representative trophies weight 250-300g, and the world-class trophy category is 500+g. Plain agricultural lands produce larger trophies, while the hilly and forest covered areas, where the hunt is more challenging, have smaller ones.

Hunting Areas:

Our Roe Buck hunts take place in four different subregions in Eastern Hungary and the Western part of Transylvania, Romania. All of these hunting areas are approximately a 2-3 hour drive from the nearest airport. The terrains are mostly plain and sometimes hilly, with 20-30% covered by forests and 70-80% by agricultural lands. Each of our hunting areas cover approximately 25-50,000 acres.

Hunting Methods:

The hunting areas are easily accessible. During the hunt we use 4x4 pick up trucks for looking for bucks and covering greater areas. You can also hunt from high seats at deer frequented meadows and agricultural fields. This can be combined with spot and stalk techniques.

Adopting to the deer daily habits, we hunt during the morning and afternoon hours mainly, and spend the midday hours with having a hearty lunch and visiting local tourist spots.

Recommended calibers: 7x64, 30.06, 300 WinMag, 8x57,

Expected shooting distance: 80-250 meter

Physical hardness of this hunt: 2-3/10

Hunting Upgrades and Combinations:

Hunting upgrades are available during the hunt, and the Roe Buck hunting can be combined with Wild Boar,

Mouflon, and Red Stag (in September only) as well. Please ask for details.

Accommodation:

We provide relaxing and comfortable staying at a local hotel, B&B or hunting lodge, closest to the hunting area. The daily driving time between lodges and hunting fields is 5-30 minutes.

Package includes:

- 5 representative buck (trophy weight up to 350 g)
- 4 night / 3 hunting days with lodging and full board meal
- airport transfer
- 1/1 guiding, 4x4 usage
- personal assistance
- hunting license, insurance
- trophy cleaning, official scoring

Extras (not included in the price):

- travel costs to and from Hungary or Romania
- extra hunting days: € 300/ day
- add species harvest fees or trophy upgrades
- drinks, gratuities
- non-hunter daily fee: € 200/ day
- rifle rental: € 50/ day + ammunition
- trophy shipping, taxidermy
- sightseeing or country trips on request (please ask for details)

Join us in an authentic adventure with our native guides and let us introduce You to our European Hunting Heritage and Traditions. Looking forward to hearing from You.
