Deer stalking in Norfolk 2023-2024

Muntjac – Chinese Water Deer – Sika

4 nights, 3 hunting days experience during winter and spring

Highlights

England – as largest part of the British Isles – offers the best places to hunt for the famous Muntjac, Chinese Water Deer, and Sika. These species are native in Asia, and their introduced populations are thriving and growing rapidly in England, some places declared as an invasive species – as stated by The British Deer Society, so hunting is an important tool of the game management.

The CWD and Sika hunting itself provides an excellent opportunity to practice the ancient stalking-method, raising the chance of success for Muntjac, we hunt from high-seats and blinds over baits during the winter.

If you would like to experience an exciting stalking through the famous misty meadows of England, this is the perfect hunting opportunity for you!

Hunting Season

Muntjac:	September 01. – April 30.
Chinese water deer:	November 1. – March 31.
Sika deer:	All year round

Trophy Size

Antlers of a first year **Muntjac deer** are about 3 cm long, while gold-medal trophies are about 12 cm.

Chinese water deer trophies are the eyeteeth, which are 5 cm long by a gold medal trophy.

Sika stags have Red stag-like antlers in a smaller version: beams are about 30-50 cm long, while gold medal trophies can be over 55 cm.

Hunting Areas

Our deer hunts take place in Norfolk County in a mostly agricultural countryside, where deciduous forest patches and diverse wetlands also can be found.

The deer population is healthy and well-managed, 100% shooting opportunity on mature trophy animals is expectable.

Hunting Methods

The hunting areas are easily accessible, we cover the lands with 4x4 trucks and stalk in the meadows or agricultural parcels. We also hunt from high seats or ground blinds at deer frequented areas. Combination of tactics and techniques make the hunt exciting and the hunt rewarding.

Recommended calibers: .243 or similar (Muntjac and CWD)

Expected shooting distance: 80-150 meters

Physical hardness of this hunt: 2-3/10

Hunting Upgrades and Combinations

Hunting upgrades are available in number of animals or trophy categories. February and March are the perfect timing of Muntjac-CWD combo.

Upon request, we can arrange Castle tours, non-hunters are welcome to join!
